

Muhammad Asif Awan

Software Development Engineer in Test

Contact: +92-3129989826 Email: asifmuh001@gmail.com LinkedIn: [Muhammad Asif](#)

PROFESSIONAL EXPERIENCE

ANTONX PRIVATE LIMITED | June 2021 – Present

HEAD OF QUALITY & PRODUCT DELIVERY | July 2026 – Present

- Leading Quality Assurance and Product Delivery, overseeing QA strategy, release quality, delivery execution, and cross-functional collaboration.
- Managing QA and delivery teams, driving ownership, process improvement, risk management, and production readiness.
- Working across product, engineering, and stakeholders to ensure reliable and timely product delivery.

SENIOR SOFTWARE ENGINEER IN TEST | July 2025 – July 2026

- Led QA strategy, devised release strategy, test planning, automation, and quality validation across critical product workflows.
- Managed and mentored QA resources while coordinating testing, releases, and production validation.
- Automated major and critical flows using Playwright with JavaScript and contributed to continuous QA process improvement.

SOFTWARE ENGINEER IN TEST – II | July 2024 – July 2025

- Advanced into technical QA engineering with focus on test automation, functional testing, API testing, and database validation.
- Developed automated tests using Playwright and JavaScript and supported quality across complex product workflows.

ASSOCIATE QUALITY ASSURANCE ENGINEER | January 2023 – July 2024

- Performed end-to-end testing across web and mobile applications, including functional, regression, integration, system, and sanity testing.
- Designed test cases, managed defects, and collaborated with development and product teams throughout the SDLC.
- Contributed to Agile/Scrum ceremonies and QA process improvements.

ASSISTANT PROJECT MANAGER & QA | June 2021 – Dec 2022

- Combined project coordination and QA responsibilities across requirements, planning, testing, and delivery.
- Coordinated with clients, stakeholders, developers, and QA resources to maintain project delivery.
- Supported sprint planning, backlog management, stakeholder communication, and quality maintenance.

CAREER PROGRESSION

Throughout this progression, responsibilities have expanded across Project Management, Team Management, QA Leadership, Product Delivery, Stakeholder Management, and Production Ownership.

PROJECTS

NowEdge (POS) — AntonX | UK & Pakistan

Quality Assurance Engineer | QA Lead | Team Manager

A centralized, full-fledged POS platform designed to integrate with food ordering and delivery solutions such as

UberEats, Halal Now, Deliveroo, Orkestro, and other market platforms. The product comprises 16+ modules, including Ordering, Kitchen Management, Clarity, ServeBoard, StockFlo, Deliver+, Direct>>, and others.

- Defined QA strategies and test plans for the product.
- Automated major and critical business flows using Playwright.
- Led a team of 12+ resources across QA and delivery activities.
- Served as a key QA representative and front face during the production phase, helping ensure a smooth product delivery.

HALAL NOW by HMC — UK

Quality Assurance Engineer | Project Manager

A food ordering ecosystem developed for the Halal Monitoring Committee (HMC), UK), comprising three mobile applications—NOW by HMC for customers, HMC Vendor for restaurant vendors, and HMC Rider for delivery riders—along with two administrative dashboards for Super Admin/Vendors and Riders. The application is live with 10,000+ downloads across Play Store and App Store.

- Gathered and analyzed requirements and translated them into QA and project deliverables.
- Designed test plans, wrote test cases, and performed functional testing.
- Managed communication and coordination with the client throughout the project.

COSTA COFFEE CLUB BH — Bahrain

Tester | Scrum Master

Mobile applications developed for Costa Coffee's Bahrain operations, including Costa Coffee Club BH, Costa Coffee Barista BH, and an Administrator Dashboard. Costa Coffee Club BH reached 5,000+ downloads across Play Store and App Store.

Testing: Wrote test cases and performed functional, regression, sanity, load, system, and user acceptance testing.

Scrum Master: Gathered and analyzed requirements, defined the project backlog in JIRA, created sprints, and conducted sprint planning, sprint retrospectives, and sprint reviews. Successfully supported the project through delivery.

NOCA — USA

Client Relations Manager | Quality Assurance Engineer | Scrum Master

A social network designed for people who know each other in real life, allowing users to post invitations and connect with their friends and friends-of-friends.

- Requirement Gathering & Analysis
- Client Relations
- Scrum Master
- Software Testing & Quality Assurance
